

IEEE LTSC CMI Meeting Minutes

May 21, 2010

Attendees:

Avron Barr
Fred Banks
Scott Lewis
Frank Polster
Tyde Richards (convener)
Schawn Thropp

Discussions:

We continued the discussion from the previous hour in the CMI/RTWS study group which assessed the effort required to develop IEEE standards from the LETSI RTWS project. From that discussion there was a desire to add three data elements to the 1484.11.1 data model to support a service-based approach which does not assume centralized control by an LMS. We discussed the possibility of changing the current pending PAR request for a 1484.11.1 corrigendum to an amendment. We agreed to proceed with an amendment in the near term if practicable. We agreed to that developing other possible standards would depend on evidence of demand.

Next Meeting:

28 May 2010
11am - 12pm EST

Skype phone: +9900827049304412
US 201-793-9022 + access code 9304412

Proposed Agenda Topics

Review possible projects from last week's LETSI RTWS session

- XML Binding of 1484.11.1 (minimal effort, issue - should we consider an extension mechanism)
- Web service transport standard analogous to 1484.11.2 ECMAScript standard (significant effort)
- amendment to 1484.11.1 with data elements from LETSI RTWS Project (minimal effort)
- LET Activity Conceptual Model - (significant effort, possible collaboration with LETSI)
